

FH Technikum Wien - Winter Tourism

Data Analysis: Highlights Summary

Project Overview

This Dash application analyzes Austrian tourism data from Statistics Austria's OGD dataset (2015-2024), focusing on overnight stays across nine federal provinces. The dashboard emphasizes winter tourism performance compared to summer, highlighting regional trends, annual growth, and top source markets.

Key Data Highlights

- **Winter Dominance:** Winter (Nov-Mar) accounts for 66.1M overnight stays in 2024, outperforming summer by 15% in total volume.
- **Regional Leader:** Tyrol leads with 213M winter nights, representing 39% of all winter stays.
- **Top Market:** Netherlands is the #1 foreign source market, with German states dominating in aggregate.
- **Growth Trend:** Winter showed a 6× faster post-COVID rebound than summer, reaching all-time highs in 2024.

Dashboard Widgets Summary

1. Hero Section

- **Description:** Introduces the project with the title "The Winning Season is Winter", key stats, and the FHTW logo.
